About us

EHL Profiles specializes in wood-based interior products, mouldings, and their sales and distribution. We create an environment where all group companies can thrive. With experience, knowledge, and a strong service focus, we've built a reputation as a reliable partner. Our work is driven by how we do things, not just what we do, with values that guide and unite us.

Strenghts

Experience, knowledge, and strong sense of service – through these strengths, EHL Profiles has built a high reputation as a reliable and efficient partner

Role

Create the right environment where all group companies can thrive and expand their businesses.

Belive

Our work is not just what we do but how we do it.

Value

Our values define and unite us, the beliefs that connect everyone.

EHL PROFILE is a part of the Pomona-Gruppen AB.

Pomona Gruppen is a family-owned investment and development company that has been operating since 1986. Focused on long-term growth and sustainability, Pomona specialises in developing and investing in businesses that create value and drive innovation. With a strong presence across various industries.

Through this integration, EHL Profiles Group continues to strengthen Pomona's commitment to sustainability, innovation, and value creation, ensuring quality products and building long-lasting relationships with customers.

Timeline

Sustainability

- ✓ Transparency
- ✓ Fairness
- ✓ Accountability

At EHL Profiles Group, we integrate sustainability into our operations by prioritizing ethical business, environmental responsibility, and social commitment. We focus on innovation, efficiency, and integrity to ensure our processes align with sustainable practices while supporting communities and long-term growth.

This commitment is reflected in our responsibly sourced wood materials, which absorb carbon and release clean oxygen, helping to protect the planet. Our products not only enhance interiors but also support a greener future for generations to come.

By following global standards like the UN SDGs and adopting rigorous certifications, we continually raise the bar for excellence

Gender equality

Life on land

Decent work and economic growth

Industry, innovation and infrastructure

Responsible consumption and production

Climate action

Skirting boards

Skirting is the board that runs around the room along the floor and at the bottom of a wall. A well-chosen skirting board will not only cover the dilatation gap but also provide a nice visual for the room.

Architraves

Architrave is the frame that borders around a door or window, creating a harmonious overall impression.

Architraves can also be used as cover moldings – create your own favorite pattern on the wall. Some profiles of the architraves allow them to be used as skirting boards.

Stripwood

The smooth, non-profiled surface of the stripwood gives them a wide range of use. They can be used both as floor and interior corner moldings and can also cover the differences at the junction of the two finishes. In interior design, it is possible to create unique solutions for the ceiling and wall with stripwood or use them as a room divider.

Decorative Blocks

Decorative blocks make it easy to install door and floor moldings and offer the opportunity to creatively combine moldings of different sizes. They add a unique look to the room, being ideal for connecting interior and exterior corners, for smooth transitions between door and skirting boards, and for precisely connecting the corners of door moldings.

Decorative Panels

With decorative panels, it is possible to create an amazing design for the room, using them on the wall or ceiling, in a few panels or along the entire wall/ceiling. The range of the material and finishing of the strips is wide. The most common materials are pine in various treatments and foil-wrapped MDF strips.

Frispil

The Frispil room divider is a sleek, freestanding lamella system made from premium wood, finger-jointed and glued for lasting stability. Designed for modern space separation, it features precision-cut vertical lamellas and discreet ceiling and floor rails for a clean, screw-free finish. Installation is simple: attach the rails and insert the lamellas. Use 45° rails for angled layouts or 90° rails for straight placement. The wood's natural grain adds warmth, while its structure withstands changes in humidity and temperature.
